

BIOBIKE

Want to compete?

Remote competition doesn't just mean a shared static scoreboard. BioBike simulator utilizes the Internet to connect your bay with theirs for live audio, video and data transfer.

Want to compete against your best friend in another state or country.

Forget about packing your bags, log in and let the fun begin.

Are you wishing to learn from the best who may also be a long distance away?

BioBike virtual Simulator can connect you to world class instructors. That's right, anyone, anytime, from International hotels, Cruise ships, stand alone terminals, Airports and even from the comfort of your home. Imagine the possibilities!

The BioBike simulator Internet capability lets you learn, play and compete – live online.

What's more, BioBike Internet connectivity means our full-service support staff can be (almost) literally at your door with the click of a button. Using picture in picture technology on the big screen and stereo sound, each person's

information and comments are transmitted and received. Take your game online with incredible ease.

Next level technology means for a new level of reality.

Internet Connectivity – Remote Competition

Want to compete?

Take your game online with incredible ease. Are you travelling, but still want to stay in the game? BioBike centres will become the latest and greatest in recreation for those on the road.

Hate when the weather changes and you know it will be months before you're back on the road, you can go to an available centre maybe join a league!

Corporate life doesn't have to be boring, keep that inner office rivalry in the right place – on a BioBike simulator. Improve your game and your business too.

Whether a friend in another state or someone else looking for competition, BioBike via the Internet connects your system with theirs for live audio, video and data transfer.

Using various technologies on the big screen, and stereo sound, each competitor's position on the road and comments are transmitted and received. Just drop in and compete with old friends and new, as well as the top pros of course just so long as they have a BioBike system

BioBike remote competition doesn't just mean a shared static scoreboard. Next level technology means for a new level of reality.

Internet Connectivity – Remote Play

Forget about packing your bags, log in and let the fun begin.

Absence might make the heart grow fonder, but there's nothing like having those weekly matches with your friends, wherever they are.

As long as they can find their way to a High Definition BioBike simulator, you might as well be riding in the same Bunch/group together.

Getting ready for that long dreamed of vacation in France or Italy. Make the most of it by riding those famous roads – learn where to save yourself and where to

attack your mates when you are actually live on the ground and you recognise a land mark from the simulated experience

Surprise your friends next time you go for a ride – they'll never know you've been riding in your lunch hour or before or after work! Doesn't matter whether it's the local sports bar, nearby BioBike center or even better in the corporate fitness centre – you can find a match!

Next level technology means for a new level of reality.

Internet Connectivity – Remote Instruction BioBike/HTV connects you to your favorite instructors.

That's right, anytime from the comfort of your home.

Imagine the possibilities!

With the optional pedalling and body analysis and coaching module, help is never further away than the nearest BioBike/HTV simulator.

BioBike/HTV's standard system is known for the accuracy of its data capture for so many important body motion areas. Your instructor will have a live audio, video and data connection with your bay. You will have them on your big screen with stereo sound.

The extensive accurate data collected for the chosen action such as pedalling technique, as well as control of high speed colour video cameras allows your remote instructor to make complete motion analysis and comparisons.

Internet Connectivity – Remote Diagnostics

No more waiting for tech support or parts that have been backordered – just press "H" on the keyboard and your system is directly connected to the engineers who designed the system.

All BioBike/HTV models include Internet connectivity that provides live remote diagnostics and support.

The standard HD system utilizes the Internet to enable our full-service support staff to be (almost) literally at your door with the click of a button.

Have you heard or experienced the nightmare stories of contracted computer support? Days, weeks or months of downtime. The hassle of packing and shipping faulty sensor parts or circuit boards.

BioBike/HTV capture technology was developed originally for international factory automation applications. Our motion detection systems were designed and built to operate in harsh environments.

In the unlikely event that something is not functioning properly with a BioBike/HTV system, one click of the keyboard connects our staff engineers for live, remote diagnostics.

The same technicians that designed and built your BioBike/HTV simulator will diagnose and correct any problems immediately.

You'll be up and riding away again in minutes with no problems
